Information Technology Experience Program

## Parents/Guardians Information

The Program

Your child has the opportunity to experience the work of network engineers, technical support, client support, account procurement/sales engagement, customer relationship building, and the underlying business practices that build a viable, strong IT company. This program is fully connected to your child's high school which may result in credits/experiences to enhance your high school degree.

Involvement

Your child will spend two weeks, two hours a day with 3RT Networks staff. The experience gives your child an overall look at the entire IT business cycle. Flexibility for additional experiences may be available depending on time of year and shared decision with 3RT Networks leadership.

Responsibilities

3RT Networks' leadership and staff will be supervising your child at all times. Transportation to/from West Salem is required. Flexibility in transportation times may be necessary depending on agreed upon schedule and activities.

A Full IT Experience For Your Child!

Information technology degrees and careers are constantly changing and evolving to serve many areas in the economy making it very difficult for parents/guardians and school personnel to keep up on all the opportunities. This IT experience gives your child a full look at the information technology/engineering business cycle with a company that serves the medical, education, and manufacturing sectors with networking, engineering, cybersecurity, and technical support.

If your child has expressed interest and you have recognized their aptitude in technology, networking, and/or engineering, this door opens to an experience that will assist your child in identifying which of these technology related areas best fit their goals and ambitions.

The experiences include observing/shadowing leadership and engineers in client engagements, technology reviews, network installs, configuring and/or repairing hardware/software, cybersecurity solutions, and building client relationships. Have your child contact the information technology instructor at your school.
