3RT Networks June 1, 2020

Information Technology Experience Program

School/Faculty Partnership Information

The Program

ITEP is a partnership program between the school and 3RT Networks. Our goal is to provide opportunities for students to experience the full IT business cycle. To assist the student in having a full experience, work logs and daily reflections along with pre-post experience interviews/ conversations will be shared with coordinating program faculty. If applicable, credit or digital citizenship standards will be documented.

Involvement

Students will have a two week, two hour a day experience. We ask faculty to be involved with 3RT leadership in identifying and selecting students, guiding their experience, and connecting that experience to school structures.

Responsibilities

3RT Networks' leadership and staff will be supervising students at all times. Transportation to/from West Salem is required. Flexibility in transportation times may be necessary depending on agreed upon schedule and activities.

IT Experience For Your Students!

A partnership with 3RT Networks in West Salem provides an opportunity for your students to broaden their knowledge and experience in Information technology. Allowing your students to shadow engineers, leadership, client support/relationship building, configuring/repair of hardware/software, network design and installation staff complements the instruction and guidance school staff provide to students on a daily basis. This IT job experience gives your students a full look at the information technology/engineering business cycle with a local, trusted company that serves the medical, education, and manufacturing sectors with networking, engineering, cybersecurity, and technical support.

Faculty recognize students' aptitude and interests in technology, networking, and/or engineering. Opening this door with 3RT Networks leads to an experience that will assist your students in identifying which of these technology related areas best fit their goals and ambitions.

To build a partnership with 3RT Networks, contact us at ITEP@3RTnetworks.com.
