

# Information Technology Experience Program

## High School Juniors/Seniors

### The Program

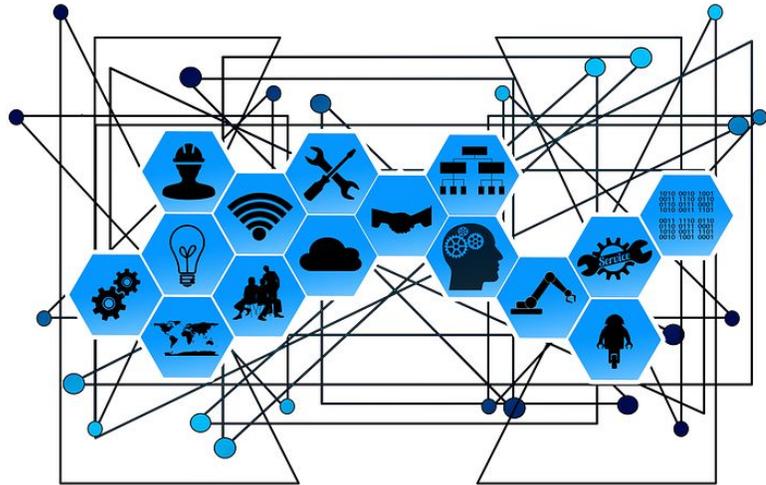

Experience the work of network engineers, technical support, client support, account procurement/sales engagement, customer relationship building, and the underlying business practices that build a viable, strong IT company. This program is fully connected to your high school which may result in credits/experiences to enhance your high school degree.

### Involvement

Two weeks, 2 hours a day. The experience gives you an overall look at the entire IT business cycle. Flexibility for additional experiences may be available depending on time of year and shared decision with 3RT Networks leadership.

### Responsibilities

Students will actively participate in all scheduled activities throughout the program. Keeping a daily 'work journal' and reflection will help focus your interests and ideas for future school and/or careers. Transportation to and from West Salem is necessary; flexibility in schedule schedule for travel a plus.

## IT Experiences For You!

Interested in learning about the information technology/engineering business from the ground up? You can do this by being selected to participate in a job experience program that allows you connections to the business and technical functions of 3RT Networking in West Salem, WI.

Having an interest and aptitude in technology, networking, cybersecurity, and engineering opens the door to an experience that will assist you in identifying which of these technology related areas best fit your goals and ambitions.

You will have opportunities to observe client onsite and video conference installations, sales engagements, or technology reviews. Configuring and/or repairing hardware/software while at 3RT provides you with hands-on experiences to share your skills. You will shadow directly with account managers, engineers, technicians, technical support and 3RT leadership. An opportunity that you don't want to pass by.

Contact your IT instructor or counselor for more information.
